Miniature Umbrella Plant*

Cyperus alternifolius 'Gracilis'

Height: 24 inches

Spread: 24 inches

Sunlight: ○ ◐

Hardiness Zone: (annual)

Description:

This variety is a shorter, more compact semi-aquatic plant producing slender green stems with green bracts; perfect for pond side planting or in wet areas of the garden; doesn't mind being submerged at the base

Ornamental Features

Miniature Umbrella Plant's attractive grassy leaves remain green in colour throughout the season on a plant with an upright spreading habit of growth.

Landscape Attributes

Miniature Umbrella Plant is an herbaceous annual with an upright spreading habit of growth. It brings an extremely fine and delicate texture to the garden composition and should be used to full effect.

This is a relatively low maintenance plant, and is best cleaned up in early spring before it resumes active growth for the season. It has no significant negative characteristics.

Miniature Umbrella Plant is ideally suited for growing in a pond, water garden or patio water container, and is recommended for the following landscape applications;

- Mass Planting
- General Garden Use
- Water Gardens
- Container Planting
- Bog Gardens

Planting & Growing

Miniature Umbrella Plant will grow to be about 24 inches tall at maturity, with a spread of 24 inches. Although it's not a true annual, this fast-growing plant can be expected to behave as an annual in our climate if left outdoors over the winter, usually needing replacement the following year. As such, gardeners should take into consideration that it will perform differently than it would in its native habitat.

This plant does best in full sun to partial shade. As an aquatic plant, it requires a suitable water garden environment and will benefit from special planting and ongoing care practices; consult one of our in-store experts for further details and instructions. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This is a selected variety of a species not originally from North America. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Miniature Umbrella Plant is a fine choice for the water garden, but it is also a good selection for planting in outdoor pots and containers. With its upright habit of growth, it is best suited for use as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. It is even sizeable enough that it can be grown alone in a suitable container. Note that when grown in outdoor pots and containers, aquatic plants like this one will require a special growing environment that meets their requirement for consistent moisture.
