Easy Elegance® Calypso Shrub Rose *Rosa 'BALypso'*

Height: 30 inches

Spread: 30 inches

Sunlight: ○

Hardiness Zone: 4a

Description:

This own root variety is very hardy and disease resistant; fully double blooms are apricot fading to pink and held in contrast to deep green foliage below, consistently blooming throughout the season

Ornamental Features

Easy Elegance® Calypso Shrub Rose features showy coral-pink flowers with peach overtones at the ends of the branches from early summer to late fall. The flowers are excellent for cutting. It has dark green deciduous foliage. The glossy oval compound leaves do not develop any appreciable fall color.

Landscape Attributes

Easy Elegance® Calypso Shrub Rose is a multi-stemmed deciduous shrub with an upright spreading habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This shrub will require occasional maintenance and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Spiny

Easy Elegance® Calypso Shrub Rose is recommended for the following landscape applications;

Planting & Growing

Easy Elegance® Calypso Shrub Rose will grow to be about 30 inches tall at maturity, with a spread of 30 inches. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 20 years.

This shrub should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This particular variety is an interspecific hybrid.
