

## Sea Green Juniper *Juniperus chinensis 'Sea Green'*

Height: 3 feet

Spread: 6 feet

Sunlight: ○

Hardiness Zone: 3a

### Description:

A popular and beautiful evergreen landscape shrub for general garden and massing use, features an arching, sprawling branching habit with downturned tips, very attractive, deep green needle-like foliage; does best with full sun

### Ornamental Features

Sea Green Juniper is a dwarf conifer which is primarily valued in the garden for its cascading habit of growth. It has attractive bluish-green evergreen foliage. The scale-like sprays of foliage are highly ornamental and remain bluish-green throughout the winter. It produces powder blue berries from late spring to late winter.

### Landscape Attributes

Sea Green Juniper is a multi-stemmed evergreen shrub with a shapely form and gracefully arching branches. It lends an extremely fine and delicate texture to the landscape composition which should be used to full effect.

This is a high maintenance shrub that will require regular care and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. Deer don't particularly care for this plant and will usually leave it alone in favor of tastier treats. It has no significant negative characteristics.

## Gertens Plant Info.

Sea Green Juniper is recommended for the following landscape applications;

- Mass Planting
- General Garden Use
- Groundcover

### **Planting & Growing**

Sea Green Juniper will grow to be about 3 feet tall at maturity, with a spread of 6 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a slow rate, and under ideal conditions can be expected to live for approximately 30 years.

This shrub should only be grown in full sunlight. It is very adaptable to both dry and moist growing conditions, but will not tolerate any standing water. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selected variety of a species not originally from North America.
