

Kiwi Hawaiian Ti Plant

Cordyline fruticosa 'Kiwi'

Height: 6 feet

Spread: 3 feet

Sunlight:

Hardiness Zone: 10a

Other Names: Good Luck Plant

Description:

A tender evergreen with cane-like stems, presenting strap shaped leaves striped yellow, yellow-green and dark green, with hot pink edges; spectacular when massed on the landscape; perfect for adding a lush, tropical look to patio borders

Ornamental Features

Kiwi Hawaiian Ti Plant is primarily valued in the landscape or garden for its ornamental upright and spreading habit of growth. It features delicate panicles of lightly-scented rose star-shaped flowers along the branches from early to mid summer. It has attractive dark green foliage edged in hot pink with hints of yellow which emerges lime green in spring. The large glossy sword-like leaves are highly ornamental and remain dark green throughout the winter.

Landscape Attributes

Kiwi Hawaiian Ti Plant is an open multi-stemmed evergreen shrub with an upright spreading habit of growth. Its relatively coarse texture can be used to stand it apart from other landscape plants with finer foliage.

This shrub will require occasional maintenance and upkeep, and should never be pruned except to remove any dieback, as it tends not to take pruning well. It has no significant negative characteristics.

Kiwi Hawaiian Ti Plant is recommended for the following landscape applications;

Planting & Growing

Kiwi Hawaiian Ti Plant will grow to be about 6 feet tall at maturity, with a spread of 3 feet. It has a low canopy with a typical clearance of 1 foot from the ground, and is suitable for planting under power lines. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 10 years.

This shrub does best in full sun to partial shade. It does best in average to evenly moist conditions, but will not tolerate standing water. This plant does not require much in the way of fertilizing once established. It is not particular as to soil type or pH, and is able to handle environmental salt. It is somewhat tolerant of urban pollution. This is a selected variety of a species not originally from North America.

Kiwi Hawaiian Ti Plant makes a fine choice for the outdoor landscape, but it is also well-suited for use in outdoor pots and containers. With its upright habit of growth, it is best suited for use as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. It is even sizeable enough that it can be grown alone in a suitable container. Note that when grown in a container, it may not perform exactly as indicated on the tag - this is to be expected. Also note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden. Be aware that in our climate, most plants cannot be expected to survive the winter if left in containers outdoors, and this plant is no exception. Contact our experts for more information on how to protect it over the winter months.
